

## Ellis Nunn and Associates

### Teton Heritage Builders

Clients of Ellis Nunn and Associates envisioned a large but cozy home in Granite Ridge with a sense of timeless style. Through the architects' design and Teton Heritage Builders' construction, the clients got their dream home: a 7,000-square foot masterpiece offering both intimacy and spaciousness.

#### Left

An entryway standing nearly two stories tall offers an expansive welcome. Pilasters of battered fieldstone accent a covered porch constructed in a traditional stacked-log arrangement of lodgepole pine, Douglas fir and reclaimed barnwood.

#### Top Right

For year-round enjoyment, most rooms connect to outside living space such as these covered decks and porches.

#### Bottom Right

A double-sided fireplace with a rustic mantle of reclaimed timbers warms both the great room and the entryway. A wrought-iron chandelier lights the room with regional flair while a handcrafted staircase of Douglas fir, lodgepole and bronze balusters leads to a study loft.
